Overview

This event is designed to provide midwives with the most up-to-date information, emphasizing recent developments in midwifery healthcare practice and to provide key solutions to the latest challenges faced by midwives. We also present a comprehensive review of disease screening and management for commonly encountered diseases in Amish and Mennonite communities. This course is intended for certified nurse midwives, direct entry midwives, and others interested in the care of newborns.

Objectives

- Examine available options for identifying couples at-risk for having a baby with a genetic disorder
- Review updates and changes to the Pennsylvania Newborn Screening Program
- Use case studies to recognize signs and symptoms in newborns of genetic disorders common to the Plain community for early diagnosis and treatment
- Identify key aspects of safe infant nutrition
- Examine care options for infants diagnosed with life-threatening conditions
- Integrate best medical practices in maternal and newborn care

Accreditation Statement

The Lancaster General Hospital is accredited by the Pennsylvania Medical Society to provide continuing medical education for physicians.

Credit Designation

The Lancaster General Hospital designates this live activity for a maximum of 5.75 AMA PRA Category 1 Credits™.
